

Viewing Your Courses on D2L Brightspace

Once you have logged in to D2L Brightspace there are **multiple places** you can access your course through that also allow you to switch between courses more easily:

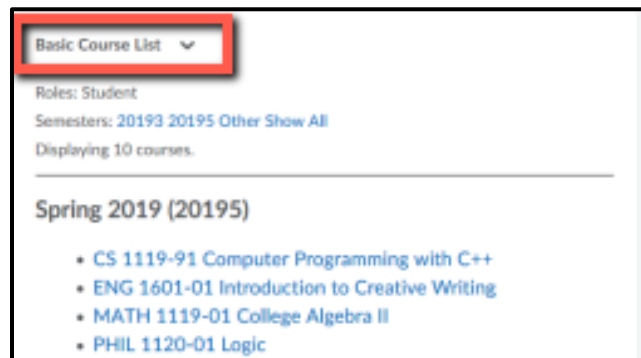

1) Courses Widget

- a) The **My Courses** widget on the D2L Brightspace homepage will show you images of all your courses. Click on them to access that course. There will also be small icons that appear on the course tiles when you have assignments to submit, unread discussion posts, and quizzes you have yet to take.

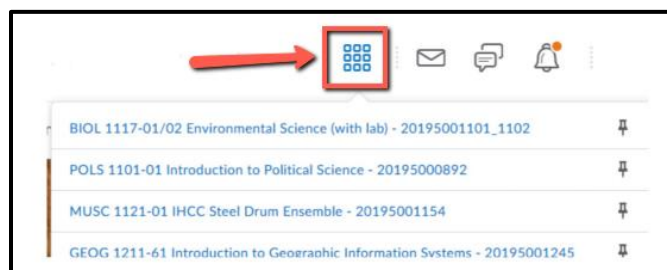

2) Basic Course List Widget

- a) The **Basic Course List** widget on the D2L Brightspace homepage will show you a simplified list of all your courses. They are organized by semester, and will appear as links that you can click on to access that course.

3) Course Selector / "Waffle"

- a) While in D2L Brightspace, at the top of the page you will see the **Course Selector** or **"Waffle"** as I like to call it. Clicking on this icon will show you a list of your active courses. You can click the thumbtack icon next to any course in this list to pin it to the top for quicker access. Use the waffle to quickly jump between courses without going back to the homepage.

Troubleshooting D2L Course Issues:

- *I'm logged in, but I don't see any classes in the My Courses widget. Where are my classes?*
 - In the **My Courses** widget, you may see the following message: "You don't have any courses to display." This could be for various reasons:
 - The class is for an upcoming semester or previous semester.
 - You registered for the class in the past two days. After you register for a course, it takes several hours for your D2L Brightspace account to be created/updated.
 - Your instructor might not have created or published the course yet. Please contact your instructor (via the campus directory) to ask if/when the class will be available in the campus D2L Brightspace site.

- *What are the numbered icons under my classes in the My Courses widget?*
 - In the **My Courses** widget, you may see up to three individual course notification icons under the class name. The icons represent unread discussions posts, assignments with unread feedback, and quizzes not attempted. Click on the icon to go to the tool in that course.
